SIZE PATTERNS

TRI-STAR 27-9 though only 27'9" long has full 6 ft. head room and yet is only 5 ft. from mast step to the water line. TRI-STAR Trimarans with their low streamlined silhouette have the flowing lines that give both functional deck space (great for lounging or handling sails) and higher bows with their reserve buoyancy. All these advantages and more are found only with TRI-STAR'S flush deck design.

TRI-STAR 27-9

- LOA - 27' 9"
- BEAM - 17' 5"
- DISPLACEMENT - 3250#
- SAILS, MAIN GENOA - 500 FT²
- DRAFT - 17"
- DRAFT BOARDS DOWN - 3' 2"

TRI-STAR 27-9 is designed with hulls that have a minimum of wetted area and a long waterline length for maximum performance. These features, when combined with the unitized flush deck construction, give her the strength and the interior accommodations of a much larger Trimaran. TRI-STAR's hull design and method of unitized construction strengthens and simplifies building (you will be in the water sooner) while providing the lowest streamline silhouette and the aerodynamic cleanliness, important in a sailing Trimaran. The flush deck's unitized construction also allows the maximum of interior spaciousness with full head room throughout the cabin without the usual ducking under cross beams. The flush deck's greater bow height with no greater silhouette height gives more bow buoyancy for a safer and dryer boat, while having the safety of an uncluttered deck for lounging and an easy sail handling area for the most inexperienced of sailors. TRI-STAR 27-9 - a comfortable, fast ocean cruising-racing Trimaran.
