 BEAM..... 20'
 DISPLACEMENT..... 4700#

SAILS WORKING..... Main-Jib - 446 FT²
 Main-Genoa - 700 FT²
 DRAFT..... 18" DRAFT BOARDS DOWN 4'

TRI-STAR 32XR is a fast-sailing comfortable Cruising Trimaran that will do well be it cruising or local racing. Tri-Star 32XR main hull has a very efficient fineness ratio which is evident in the bow on view and now even finer with the LW bows. Designed with developed round bottom hulls for maximum load carrying ability for cruising and a minimum of wetted area for fast passages. Tri-Star 32XR has full buoyancy amas and windward ama bows for maximum under wing clearance. Mast step to DWL is 5' for sleekness and for the lowest possible windage while inside the spacious interior accommodations has over 6'2" headroom. An owner in Australia says after sailing in 30Kt winds gusting to 35Kts "that the boat behaved exceptionally well, no structural problems, no breakage, a very strongly designed trimaran of exceptional qualities. Great to build, exceptional to sail, a good boat allaround." You too would enjoy a 32XR.
